Plant Activator

MINORIN

Foliar Spray

【 Effect 】

- MINORIN strengthens the wax layer of leaves.
- MINORIN increases the power which prevents infection of a bacillus.
- MINORIN improves the capability of photosynthesis of vegetables, since it contains carbohydrate and organic acid.
- MINORIN accelerates vegetable growth.
- MINORIN promotes absorption of manure.

【 How To Use 】

- Please dilute MINORIN 500 to 1000 times with water.
- Please sprinkle to leaves 100 to 200 liters per 10a as a standard.

※Don't mix MINORIN with alkaline agricultural chemicals or materials.

MINORIN (1 L)

patent pending

Spray on the Land

【 Effect 】

- Increases useful microbe around a root .
- Accelerate root growth.

【 How To Use 】

- Please dilute MINORIN 300 to 500 times with water.
- Please sprinkle on to the land 1000 to 1500 liters per 10a as a standard.

※Don't mix MINORIN with alkaline agricultural chemicals or materials.

MINORIN Land (1 L)

patent pending

INGREDIENT

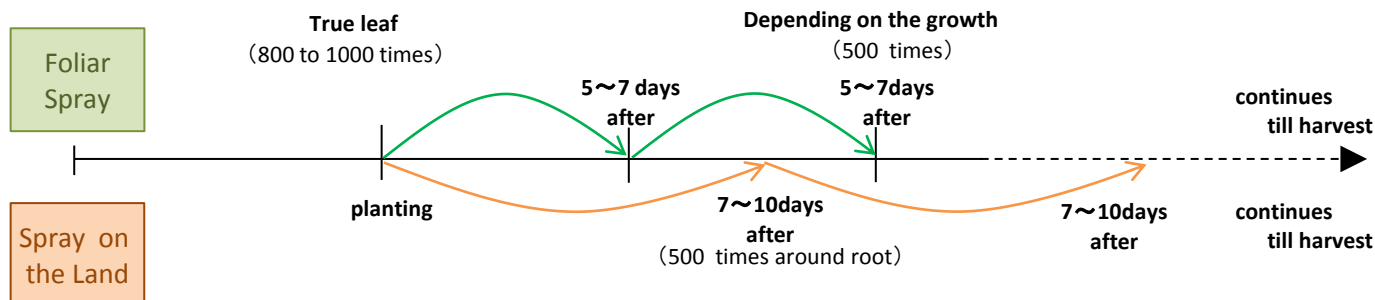

Main ingredients : Organic acid, amino acid, carbohydrate

Analysis by Oita Industrial Research Institute

| Manure ingredient | N | P | K | Ca | Mg |
|-------------------|--------|--------|--------|--------|--------|
| Foliar spray | 0.450% | 0.050% | 0.430% | 0.220% | 0.072% |
| Spray on the land | 0.490% | 0.057% | 0.500% | 0.510% | 0.102% |

Unit (%) is weight percentage (Ex.) 0.49% inside of 1 kg of samples 4.9g)

Product Line Up

Foliar Spray

【How To Use】

- Please dilute MINORIN 500 to 1000 times with water.
- Please sprinkle to leaves 100 to 200 liters per 10a as a standard.
- ※Don't mix MINORIN with alkaline agricultural chemicals or materials.

minorinG
1L

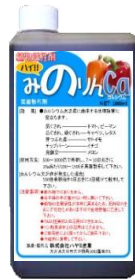

【Effect】

- MINORIN G strengthens the wax layer of a leaf.
- MINORIN G increases the power which prevents infection of a bacillus.
- MINORIN G improves the capability of photosynthesis of vegetables.
- MINORIN G promotes absorption of manure.

More Strength

minorinCa
(Calcium)
1L

【Effect】

- MINORIN Ca prevents physiological damage.
what is physiological damage?
 - discoloration of leaves
 - not sund growing
 - blossom-end rot of fruit

More Calcium

minorinMg
(Magnesium)
1L

【Effect】

- MINORIN MG increases photosynthesis ability.
(MINORIN MG is effective, especially if used in the rainy season.)
- MINORIN MG supplies magnesium.
- Nitrate nitrogen in a plant is reduced.

Photosynthesis

minorinP
(Phosphoric acid)
1L

【Effect】

- Flower bud is promoted.
- Reproductive growth is promoted.
(Please sprinkle before the bloom.)

Flower-Bud

Spray on the Land

minorin
Land
1L

【Effect】

- Increases useful microbe around a root .
- Accelerate root growth.

【How To Use】

- Please diluting MINORIN 300 to 500 times with water.
- Please sprinkle into the land 1000 to 1500 liters per 10a as a standard.
